MICHAËL GRAF

Senior Full-Stack Consultant
Java Typescript Angular/React

20+ years experience

grafmik@gmail.com
+41.78.698.12.06

Avenue de Cour 155
1007 Lausanne

Skills

Languages, tools : Typescript/Javascript, Angular, React, bootstrap, Java, J2EE, JEE, Web Services, Spring, Spring MVC, Spring Data, JPA, Hibernate, ESB/JMS, JUnit, slf4j, IntelliJ
Database : Oracle, PL/SQL, JDBC, Flyway/Liquibase
Integration : Git, Maven, Bitbucket, Jira, Jenkins, Sonar, Docker
Methods and architecture : Feature Workflow, Code Review, SCRUM, Agile, TDD

Education

2009 **MBA (Master d'Administration des Entreprises)**
option : Projet management
IAE Sorbonne, Paris

2002 **Computer engineering degree**
option : Software
UTBM, Belfort

Languages

- French Native
- English Fluent
- German Basic

Experience

Personal development projects – Lausanne, Switzerland — November 2025 – present (1 year)
Role : **Senior developer**
Mission : **Combining 20 years of technical expertise with generative technologies to build high-impact solutions. Code is no longer an end in itself: value lies in product vision and the ability to orchestrate and oversee AI to accelerate value delivery**
Achievements : **a few projects visible on 9mp.org**

Hotela – Montreux, Switzerland — December 2024 – July 2025 (8 months)
Role : **Full-stack technical expert & Technical coach**
Mission : **Supporting the digital transformation of a legacy monolithic system towards a modern architecture**

- Technical coaching of 4 developers on modern technologies and suitable development practices
- Definition and implementation of quality standards (code reviews, structuring, automated tests)
- Design and development of a Java Spring Boot / Angular application integrated with external services
- Close collaboration with a Swiss partner organisation
- Discovery of agentic AI with Junie in IntelliJ : observed productivity gains

Technical Context : Java, Spring Boot, Angular, OpenAPI, REST, Azure, Git, SQL Server, TDD, Agile, Scrum

City of Lausanne – Lausanne, Switzerland — February 2024 – August 2024 (7 months)
Role : **Back-end developer**
Mission : **Development of an application managing commercial permits for the City of Lausanne**

- Development, integration, and testing
- Discovery of generative AI : GitHub Copilot already makes writing code easier

Technical Context : Java, GraphQL, OpenAPI, Spring Data, Hibernate, PostgreSQL, Docker, Git, Gitlab, Redmine, Scrum, Agile

Globaz – Neuchâtel, Switzerland — October 2023 – December 2023 (3 months)
Role : **Back-end developer**
Mission : **Development of an application proposing investment strategies within the legal framework of a Swiss occupational pension plan (2nd pillar)**

- Development, integration, and testing
- Meeting strict deadlines

Technical Context : Java, Quarkus, REST, Hibernate, Envers, Liquibase, PostgreSQL, Keycloak, Docker, Git, Sonar, ArchUnit, Renovate, Dependency-Track, Gitlab, Jira, TDD, DDD, hexagonal architecture, Feature Workflow, Scrum, Agile

9mp.org - Project incubator – Lausanne, Switzerland — January 2021 - September 2023 (2 years and 9 months)
Role : **Full-stack technical expert**
Mission : **Development of various applications (learning, quiz, image generation)**

- Development, integration, and testing
- Technology watch

Technical Context : Java, NextJS, React, Flutter, Solidity, Machine Learning tools

Etat de Vaud – Lausanne, Switzerland — November 2016 – December 2020 (4 years and 2 months)
Role : **Full-stack technical expert**
Mission (2016-2018) : **Cyberadministration access portal**
Business : **Issuance of dematerialized state benefits (eg civil status certificates, municipal authorizations, etc.), identity management and electronic communication management between authorities and citizens - Team Cyber (Portal and Exchange)**

- Introduction of Feature Workflow and Code Review for better code quality, based on my previous experiences

- Discovery of the state "business" : positive experience with a public administration
- Synchronization with multiple teams, including business, architecture, ESB, operations, publishing, archiving, etc.

Mission (2019-2020) : **Department for Education**
Business (2019) : **Improvement of an application for managing exam registrations, qualification procedures, issuance of titles and electronic archiving**
Business (2020) : **Development of a new BackOffice application receiving requests for cyber services from my 2016-2018 mission**

- Sharing of my expertise from the first mission with the new team: good practices, tools, etc. to improve efficiency and quality
- Use of the functionalities of the framework developed in the first mission to accelerate and standardise the development of new services

Technical Context : Java, Javascript, Angular, REST, JSON, JEE, Spring MVC, Spring Data, Hibernate, SQL Server, Oracle, Jaxb, Jackson, ESB, Git, Tomcat, Jira, Bitbucket, Feature Workflow, Jenkins, Scrum, Agile

Lombard-Odier – Geneva, Switzerland — September 2016 – October 2016 (2 months)
Role : **Front-end developer**
Mission : **Team strengthening and recovery of customer satisfaction**
Business : **Access Rights Manager**

- Difficult initial business/commercial context
- Restoration of customer confidence thanks to increased frequency of deliveries and feedback, based on the Scrum methodology
- Implementation of the whole front-end part

Technical Context : Javascript, AngularJS, Swagger, REST, JSON, Git, Scrum, Agile

E-just – Geneva, Switzerland — November 2015 – August 2016 (10 months)
Role : **Full-stack technical expert**
Mission : **Online justice application development**

Business : **Commercial dispute settle**

- Full Stack Development : JavaScript/Angular and Java/Spring/Hibernate
- Code quality guaranteed by a Feature Workflow and Pull Requests validated by a code review between coworkers
- Expanding start-up, ambitious funding, innovation

Technical Context : Javascript, AngularJS, REST, JSON, JEE, Spring MVC, Spring Data, Hibernate, SQL Server, Spring Security, Flyway, Jackson, Git, Tomcat, Jira, Bitbucket, Feature Workflow, Scrum, Agile

Ateliers Nomades – Geneva, Switzerland — April 2015 - August 2015 (5 months)

Role : **Student**

Mission : T**echnological exploration and application development**

Technical Context : AngularJS, React, Ionic

parrain.org – Geneva, Switzerland — November 2014 – March 2015 (5 months)

Role : **Full-stack technical expert**

Mission : **Crowdfunding site development (in French, parrain means patron)**

- Site conception (Javascript, **AngularJS**)
- Technical help and guidance on Java backend (JHipster, Spring, OAuth)
- Client-server I/O spec (JSON, REST)
- Deployment (hosting, server install/config, development workflow, Git, Jenkins, etc.)
- Development, tests and integration

Technical Context : JHipster, **Javascript**, **AngularJS**, REST, JSON, JEE, Spring MVC, Spring Data, Hibernate, SQL Server, Spring Security, Jenkins, Git, Cloud9, Docker

Pictet – Geneva, Switzerland — September 2013 – October 2014 (14 months)

Role : **Expert and Technical Lead in Javascript / Angular.js**
Mission : **Development of several thin client (=in the browser) business applications**
Business : **Complete development of 2 main applications : Client base management software, and Incoming document management software**

- Software architecture conception of the web client (Javascript, AngularJS)
- Client-server I/O spec (JSON, REST)
- Development, tests and integration
- Critical and urgent application successfully delivered on schedule and budget

Technical Context : **Javascript**, **AngularJS**, REST, JSON, JEE, Spring MVC, Spring Data, Hibernate, SQL Server, Spring Security, Jenkins, Sonar, Git, SVN, Tomcat

9mp.org - Project incubator – Lyon, France — February 2012 – July 2013 (18 months)
Role : **Lead developer**
Mission : **Development of several websites (gaming, chat, prospect management)**

- Direction, coordination and organisation
- Management and formation of 7 team members
- Development and integration, technical reference
- Deployment (hosting, server install/config, development workflow)
- Technology watch

Technical Context : **AngularJS**, Node.js, Jquery, HTML5, CSS3, Bootstrap, Ruby, Java, php, flash media server, Debian, ssh, server bash/CLI

Société Générale SGCIB – Paris, France — February 2010 – February 2012 (24 months)
Role : **Software consultant**
Mission : **Data aggregation software development**
Business : **Pricing data and KPI (Key Process Indicators) management**

- Agile daily meetings

- Specifications and documentation
- Application architecture conception
- Development and integration

Technical Context : Java, EJB, JPA, Oracle, Spring, Hibernate, Swing, Web Services, Maven, Tibco, JMS

IAE Sorbonne – Paris, France — September 2008 – July 2009 (1 year)
MBA (Master d'Administration des Entreprises)
option : Project management

Cosmosbay-Vectis / Sanofi-Aventis (pharmaceutical laboratory) – Lyon, France — March 2006 – July 2008 (28 months)
Role : **Software consultant**
Mission : **J2EE business software development**
- Collection of the user's requirements
- Database conception
- Development, tests and integration
- Familiarisation with SAP, the company supply chain management software

Technical Context : Java/J2EE, HQL, Eclipse, Oracle, SAP, Struts, Spring, Hibernate

Sword Group / EDF (French national electricity company) – Lyon, France — October 2005 – February 2006 (5 months)
Role : **Software consultant**
Mission : **Application redesign on a new web portal**
- 3-tier architecture experience
- Tight schedule : up to 20 people at once for a 5-month project
- Specifications, development, documentation and tests

Technical Context : Java/J2EE, Weblogic, EJB, MDB, JMS, Oracle, UML

Sword Group / Ministry of Agriculture – Lyon, France — April 2004 – September 2005 (18 months)

Role : **Software consultant**

Mission : **Thick GIS client (Geographic Information System)**

- Specifications writing
- Required feature development
- Documentation
- Tests
- Maintenance

Technical Context : Java, Swing, FOP, Eclipse, PowerAMC
